INTENDED USE

Adjuvant washing of fabrics such as bleaching and cleaning of the house as a disinfectant.

METHOD FOR USE

Hand washing

Dilute 1 glass of Bleach (100 ml) every 5 litres of cold water (in presence of stubborn stains, coffee, wine, fruit, increase the dose).
 Dip the garments and let them soak as needed. Rinse and proceed with the usual washing.
 Do not use the pure product on fabrics. Do not use the product on wool and silk. Do not use the product together with acids, detergents, ammonia and soap.

Laundry in washing machine

For machines with automatic bleaching: follow the manufacturer's instructions.
 For the others: put all the white items in the washing machine and select the shorter wash cycle. While the water is flowing, pour a glass of bleach into the detergent tank, without adding detergent.
 After the centrifuge, add the rest of the laundry, then wash with the usual cycle and regular detergents.

Hygiene of the house

For the daily hygiene of floors, tiles and sanitary ware, dilute 1 glass of Bleach every 2 litres of water.
 For the toilet, pour 1 glass of bleach along the walls and leave to act, then rinse.
 Warning: do not use pure on metal surfaces.
