INTENDED USE

Salt specifically designed for dishwasher.

To avoid scale deposits on the dishes in the dishwasher the dishes must be washed with soft water and salt for water softening Dishwasher effectively thus avoiding the formation of a white film on the dishes, due to the presence of limestone.

Is sodium chloride free of impurities and perfectly soluble. Its use increases the cleaning power of your detergent making sure dishes sparkle and streak.

It leaves no residue and its purity ensures that the anti-scale system to function optimally by removing the salts and minerals in the water forming calcium deposits on crockery and in your dishwasher.

Use salt specifically designed to ensure a better quality of washing, a saving of electricity and extends the life of your dishwasher.

METHOD FOR USE

Pour Salt for dishwasher in the compartment, following the indication of the dishwashing machine manufacturer. The operation is repeated every time you turn on the salt depletion warning light.

Use salt specifically and in the right amount helps to keep in perfect condition the dishwasher, wash better and to avoid possible damage to the limestone.

Do not use table salt because it dissolves completely and contains little impurities, which, over time, may damage the anti-scale system of the dishwasher.

Product not for food use. Store in a dry place.
